WO # Job # Description JOB INFORMATION

79035 1 WATER HEATER WILL NOT STAY LIT. FLAME IS VERY WEAK
Water heater not burning hot enough
Took the burner tube off and made sure no debris was in the tube.
Took lp line off valve and did a lp test on that line with
furnace running and it was real low. Checked inside to make sur
hose wasn't pinched it was good. Went under the unit and found
the line was pinched at the manifold so i pulled some of the lp
hose down from inside and turn the manifold so the line would not
be pinched and tested my lp connection and no leaks and turned on
the water heater and it ran properly

79035 2 THE WALL BOARD IN 2 PLACES IS LOOSE
Paneling and rubber trim
Popped staples in the paneling to hold it in place below the
window and in the corner. Used a heat gun to soften the rubber
trim so it would lay flat. Took pictures of the process.
