FLAME IS VERY WEAK Water heater not burning hot enough Took the burner tube off and made sure no debris was in the tube. Took lp line off valve and did a lp test on that line with furnace running and it was real low. Checked inside to make sur hose wasn't pinched it was good. Went under the unit and found the line was pinched at the manifold so i pulled some of the lp hose down from inside and turn the manifold so the line would not be pinched and tested my lp connection and no leaks and turned on the water heater and it ran properly
