WO # Job # Description JOB INFORMATION

79087 4 THE REAR JACKS ARE NOT WORKING
No power to rear stabilizer jack
On doing my final i tested the stabilizer jacks and the rear jack
had no power. So after looking into it it was missing the power
wire. So i traced the power wire from the front and across to the
side with the controller and it was never hooked up from factory.
So i put a heat shrink butt connector on the wire and ran it to
the breaker for the controller. I put wire loom on the new wire
to protect it. Stabilizer jack works properly now.
