WO #	Job #	Description	JOB INFORMATION
79283	1	THE PANEL BETWEEN THE REFRIGERATOR AND THE REAR SIDE OF THE SLIDE ROOM IS WARPED. THIS IS THE PANEL THAT HAS THE THERMOSTAT ON IT. COME GET WRITER BEFORE RUNNING ROOM OUT BECAUSE IT WILL CATCH THE THERMOSTAT AND RIP IT OFF THE WALL WHEN THE ROOM IS RAN OUT IF SOMEONE ISN'T THERE TO HELP GUIDE IT. CUSTOMER NEEDS TO PICK THIS UNIT UP WEDNESDAY (03/18) AFTERNOON. Ran the slideroom out with help from another tech because of slideroom hits the thermostat. Took pictures of the warped wall. Unscrewed the thermostat and lp detector from the panel. Disconnected the power from them. Found the panel was to tall causing the panel to bow out. Took the panel to the table saw and shaved a blade width off the bottom. Set panel up to check clearance. Added more studs behind the panel so the thermostat was solid. Connected the thermostat and lp detector and stapled the panel back up.
