WO #	Job #	Description	JOB INFORMATION
79394	1	CUSTOMER ADVISES THAT THE WATER PUMP ONLY RUNS INTERMITTANTLY Water pump intermittent runs On inspection of the water pump i have good pressure at my faucet but the water pump never shuts off and it was real hot to the touch. I tried pulling from water tank and turn it on winterize mode and pull from a bucket same results. So i put in for a new water pump. And it works properly and now leaks.	
79394	3	CUSTOMER ADVISES THAT THE A/C RATTLES WHEN RUNNING ON HIGH FAN SETTING. Ac making a rattle sound when on high So inspection of the ac unit and i heard the rattle or vibration sound. So i took the inside trim ring down and turn the ac back on and the sound went away. So i noticed there was a wire with a plastic connector on it laying loose. (it was used for a different style controls) so i zip tie it to a group of wires and put it back together and turn it on each setting and no rattle. Ac good to go
