Job #SUMMERA - External

COMPLAINT: DE-WINTERIZE MOTORHOME (CLASS A)

CAUSE: Dewinterize unit

CORRECTION: Put water in fresh tank and flushed out all the lines. Then hooked up to city water and found that the water pump had a bad check valve in it. So customer brought us one and i got it replaced. Then i found a leak at the water line to the ice maker that we got it fixed. Then the outside shower had the hot capped off but when i ran the cold through it it was coming out the hot port on the faucet so i was told to cap off the cold and i removed the faucet. So then i flushed out the lines on city water and found the kitchen faucet was clogged and wouldn't let the water flow like it should so i took the filter off and cleaned the debris and it works properly. Refrigerator line still had a drip so we put a new flare on it and no more leaks.
