Job #	Description	JOB INFORMATION	Type	Bill To
1	COMPLAINT:	FOUND AT THE TIME OF DROP OFF/DAF- THE W 1021 FORES		
		ODS REAR SLIDE OUT WILL NOT CLOSE- TECH		
		THINKS IT MAY BE A SLIDE OUT SWITCH-		
		NEEDS TO BE DIAGNOSED-		
	CAUSE:	Bad slide motor. I put a battery on the		
		unit, plugged it in, hit the switch and		
		the slide made a noise, and that's it. I		
		verified that the battery was given out		
		12 volts and it is. I pulled the monitor		
		panel out and verified the incoming and		
		outgoing voltage at the switch. I		
		partially dropped the underbelly,		
		checked the voltage at the motor and		
		it's good. I hooked a battery directly		
		up to the motor and it didn't make a		
		sound. We need a new slide motor. The		
		ID tag for the motor is on the top side		
		of the motor so I had to push the		
		sub-floor up and take multiple pictures		
		of the tag. I tucked the underbelly back		
		up and put the monitor panel back in		
		place. I had to run the slide in		
		manually.		
	CORRECTION:	...
