**Job #1 - Warranty**

COMPLAINT: CUSTOMER STATES FURNACE WILL NOT LIGHT

CAUSE: Couldnt duplicate customer complaint first diagnosis.  
 When customer picked up, furnace wouldnt stay lit. Found exposed 12 volt line near exposed wiring in connectors. Wiggled wire bundle and furnace stopped working. Restarted furnace and flame stayed. Furnace ran until wire bundle moved again. Bad connections at wire bundle next to furnace. / Poor air intake

CORRECTION: Ran furnace off and on all day no issues. Inspected all duct work and vents for proper flow. Allowed furnace to cycle on and off. Furnace operation normal entire time unit was tested. Completed

After returning unit to bay, replaced all connections in wire bundle next to furnace and capped exposed live 12 volt wire. Tested unit. Starving for air on intake. Not enough cubic feet of space in area where furnace is installed. Pulled furnace and tested. Verified furnace operation out of unit. Need pre authorization to install air intake vent from bathroom to furnace area. Have to remove entire dresser assembly to remove furnace. See pictures.
