

## WARRANTY REQUEST FORM

Email [warranty@wfcotech.com](mailto:warranty@wfcotech.com) • Fax 574-294-8698 • Phone 574-294-8997 option 1

**For All U.S. Customers:**

**Warranted product MUST be returned to WFCO Technologies for testing.**

The following forms must be completed and emailed or faxed to WFCO Technologies along with the *PROOF OF PURCHASE* when requesting warranty consideration.

**STEP 1** - Complete all entries on the Warranty Information form immediately following this notice. **If a Credit Card Authorization form is completed, the new product will be expedited and shipped within 1-2 days.**

**STEP 2** - The form that follows the Warranty Information sheet is a Troubleshooting form that pertains to the product for which you want warranty consideration. Please complete the questions on the form.

**STEP 3** - Email the Warranty Information form, **PROOF OF PURCHASE**, PROOF OF DATE OF DELIVERY (if different than the date of purchase) and the Troubleshooting form for the product to [warranty@wfcotech.com](mailto:warranty@wfcotech.com). Enter **"Warranty Request"** in the subject line of the email message. To fax information, 574-294-8698. All warranty requests will be processed within three business days of receipt.

### WF-9800, WF-8900-REP & WF-68100 SERIES TESTING PROCEDURE

Disconnect the battery to isolate the converter. Is battery disconnected: yes Yes/No? Plug the shore cord into 30 or 50 AAC service as required. Is shore cord plugged into 30/50 AAC: yes Yes/No?  
 Verify 120 Vac is being delivered to the converter. This can be accomplished by measuring the voltage across the receptacle Power and Neutral: Voltage at Converter: 123 VAC.  
 Turn off the converter's breaker. Has continuity  
 Pull the reverse protection fuse(s) in the end of the converter and measure the fuse continuity: yes / ∞ OHMS.  
 Replace the reverse protection fuses and turn the breaker on.  
 At the converter, measure the voltage across the +VCC and Neg- lugs: 14.42 VDC.  
 At the power distribution box, measure across the fuse board Pos+ and Neg- lugs: 14.40 VDC.  
 Do the lights work: yes Yes/No? Explain: green light inside converter  
light is flashing from blue to green when connect to battery.
